## OBJECTIVE

I'm a 3<sup>rd</sup> year ISE student at MIT Mysore exploring AWS, getting hands on with network tools, Cloud computing, Full-Stack and Cybersecurity enthusiast. Leveraging AI pair programming for rapid prototyping. Open to entry level jobs in a reputed organization where I can apply my knowledge, programming skills and problem solving abilities to contribute to organization growth.

## SKILLS

- |                           |                                             |
|---------------------------|---------------------------------------------|
| • <b>Languages</b>        | Java, C, Python, JavaScript, HTML, CSS, SQL |
| • <b>Tools/Frameworks</b> | React.js, Node.js, Express.js, Ubuntu       |
| • <b>Databases</b>        | MongoDB, MySQL                              |
| • <b>Other</b>            | Git, GitHub, VS Code, Thunder Client        |

## EDUCATION

2023 - Present

### Bachelor in Information Science and Engineering

Maharaja Institute of Technology Mysore , Belwadi

- CGPA: 8.4 , Relevant Courses: Full Stack, Databases

## ACHIEVEMENTS & HACKATHONS

### Award of Excellence — Build for Bengaluru (REVA Hackathon)

- Recognized among the top tier of 150+ competing teams for rapid prototyping and deployment of a scalable solution under strict time constraints.

### 4th Place — Vision X 2025 Hackathon

- Successfully developed and pitched a functional project iteration at MIT Mysore, collaborating with a team to handle both technical implementation and high-level problem solving.

## INTERNSHIP EXPERIENCE

### Full Stack Web Developer Intern | Prodigy Infotech

1st October 2025 – 31st October 2025

- Built 4 working Full Stack Projects.
- Performed API testing and validated RESTful endpoints (GET, POST, PUT) using Thunder Client.
- Managed version control and code repositories using Git and GitHub.

## PROJECTS

### Portfolio Website

Personal Project — View @ <https://shashank-tech.netlify.app/>

- Designed and deployed a responsive portfolio site to showcase projects and skills.
- Built a responsive UI using HTML5 and deployed via Netlify.

### AI-Muse-Research-Platform

Used MongoDB, Node.js and Gemini API key

- Developed a full-stack web application which can be used for research purposes on any topics.
- Integrated Google's Gemini API to generate accurate, context-aware research summaries.

### Pacha Cover

Used Python, Node.js, Google OAuth, JavaScript

- Pacha Cover uses satellite data, AI, and citizen science to identify urban heat islands across Bengaluru's 198 BBMP wards and mobilise residents to restore the city's disappearing tree canopy one adopted spot at a time.

## CERTIFICATES

- **AWS Cloud Practitioner Essentials:** Fundamental and foundational understanding of Cloud Computing.
- **Programming in Java (NPTEL):** Completed foundational Java programming coursework via the IIT NPTEL platform.
